110

1. Regarding the status of the instant application, the Examiner has found new ground of rejection/ restriction. The Examiner is obliged to apply the newly found rejection/restriction. Thus, the finality of the prior Office action has been withdrawn and new restriction follows. The Examiner regrets the delayed process of the application. Accordingly, claims 1-19, 21-40 and 43-53 are pending.

RESTRICTION

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I, claims 1-19, 21-37 and 43-53 drawn to a method/system for securing digital image, classified in 713/176 or 380/201.

Group II, claims 38-40 drawn to a method of tracking the use of information, classified in class 700/94 or 707/104.1.

The inventions are distinct, each from the other because of the following reasons:

Group I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in order combinations (MPEP 806.05 ©). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the system of group II does not claim a secure digital data as recited in group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Allowable Subject Matter

3. Claims 1-19, 21-37 and 43-53 would be allowed if Applicant overcomes the rejection/restriction.
